

Learning Platform Customization & Integration

We customize, integrate, and support third-party and customer's **proprietary** Content Management Systems (CMS), Learning Management Systems (LMS), **Authoring Systems**, **Publishing Systems**, and **other** Learning Technologies.

We specialize in making your technology investment deliver its promise.

We make your technology deliver its promise.

Case Studies

Telligent CMS Customization for Microsoft's "Born to Learn" Portal

"Born to Learn", a community portal that enables IT experts and Microsoft certified professionals to gain and exchange technical knowledge on Microsoft training and certification, was migrated to the latest version of Telligent. Vidyatech started providing customization and maintenance services for this platform in the year 2009. We continue to customize, maintain, and support the portal till date. The portal was successfully hosted on Azure much before Telligent's official launch on cloud-computing platform.

"Great job! The migration was smooth. The new site in Telligent looks neat and performs really well. Thanks Team for making it happen...We did not have to move to Joomla or WordPress. "

Program Manager, BTL, Microsoft

NopCommerce Customization and Integration for NYCE's Learning Platform

Vidyatech customized the open source NopCommerce platform to create NYCE's online store and Distributor Management System. NYCE's distributors worldwide use the Distributor Management System to setup their online store and to sell NYC English product licenses in their markets. The NopCommerce system was also integrated with the License Management System and eLearning platform.
